Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 6/10/05.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 10 June 2005 have been fully considered but they are not persuasive. Because as applicant's remark that "the limitation controlling the switching operation in the standby mode according to a feedback voltage from the feedback circuit", the examiner respectfully disagreed because Huh et al. clearly disclosed the added claimed subject matters (see abstract, line 5-15). Further with respect to claims 24-27, it is noted that the assembly of Huh et al meet the structural limitations, see fig 1 and column 1, line 55-69 of Huh et al, with respect to claims 28-31, Huh et al clearly disclosed the claimed subject matter see, column 4 lines 40-50.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2838

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-13 and 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Huh et al. (U.S. Patent # 6,252,783).

Huh et al. disclose the claimed invention a switching mode power supply (figure 1-4), including a power supply unit (figure 1, item 100), a main switch (figure 1, item SW1), a primary coil (figure 1, item L1), a normal operation mode (Abstract, line 1-3), a mode setting unit (Abstract, line 4-7), a feedback circuit (figure 1, item 200), a switching controller (figure 1, item 300), switching on/off in standby mode (column 2, line 10-16), a feedback circuit and current varies with mode setting (column 3, 35-55), the normal operation mode being different from the quantity of current flowing through the switching controller in the standby mode.(column 7, line 1-45). The newly added claims also

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hong et al. (U.S. patent #6,646,894) in combination with Huh et al. (U.S. patent # 6,252,783).

Hong et al. disclose the claimed invention a switching mode power supply (figure 1), including a power supply unit (figure 1, item 100), a main switch (figure 1, item Qsw), a mode setting unit (figure 1, item 400), a standby mode (column 2, line 15-30). Hong et al. does not disclose the utilization of the technique for feedback circuit. Huh et al. teaches the utilization of the similar technique for feedback circuit (Abstract, line 5-15). It would have been obvious one having an ordinary skill in the art at the time the invention

Art Unit: 2838

was made to modify Hong et al.'s power supply by utilizing the technique taught by Huh et al. for the purpose of increasing efficiency of the power supply.
